Go from reactive to proactive.
# That's smarter.

Lenovo ThinkSmart Manager gives IT teams the power to think bigger.

Managing a fleet of devices can be exhausting, running from one "urgent" need to another. Those big-picture IT goals always seem just out of reach. It's time to move beyond the crises.

Lenovo ThinkSmart Manager is your go-to manageability console, giving IT teams the power to deploy, monitor, and troubleshoot their **Lenovo ThinkSmart devices**—all from one place. This innovative software is part of Lenovo's end-to-end Smart Office solution, enabling a more collaborative, creative, and intelligent workplace.

Free up your schedule for something amazing.

You've got big IT ideas—ambitions to improve efficiency and help boost the company's bottom line. With remote real-time access to all your Lenovo ThinkSmart devices, **ThinkSmart Manager** gives you the time to make them happen.

Hassle-free process

- Manage right out of the box
- Remotely set up devices from anywhere with cloud access
- Leverage a single console to remotely deploy, manage, configure, update, and resolve issues

Real-time access

- Proactively remove blockers
- See real-time status by device
- Fix problems before they are reported using live at-a-glance issues list

Smarter operations

- Streamline actions across multiple devices with "apply all" option
- Generate reports to keep tabs on device issues and trends
- Allow role-based user access

Elevated security

- Protect data with Lenovo Secure Authentication (leveraging hardware-based TMP 2.0)
- Elevate overall device security with BIOS/SVP change management
- Prevent unwanted USB port use with Enable/Disable USB Boot and USB Port Blocking features

ThinkSmart Manager is transforming enterprise IT and unleashing productivity. Learn more at **www.lenovo.com/ThinkSmart**.
